

TABLE OF CONTENTS

PREFACE	vi
----------------------	----

CRUDE OIL AND HYDROCARBON FLUID FOULING

Analysis of fouling rate and propensity for eight crude oil samples in annular test section	1
A. Smith	
Deposition from a sour heavy oil under incipient coking conditions: Effects of surface material and temperature	9
W. Wang and A.P. Watkinson	
Fouling monitoring in crude oil preheat trains	18
H. Erdener Akinç, M. Becer, M. Bakır, Y. Özçelik, and F. Balkan	
Crude oil fouling field data and a model for pilot-plant scale data	22
H.M. Joshi	
An industrial case study on retrofitting heat exchangers and revamping preheat trains subject to fouling	27
E.M. Ishiyama, S.J. Pugh, J. Kennedy, D.I. Wilson , A. Ogden-Quin and G. Birch	
Investigation of fouling rates in a heat exchanger using an innovative fouling rig	36
M. Ratel, Y. Kapoor, Z. Anxionnaz-minvielle, L. Seminel, and B. Vinet	
A sliding mixed-integer linear programming approach for the optimization of the cleaning schedule of crude preheat trains	42
J.C. Lemos, B.C.G. Assis, A. L. H. Costa , E.M. Queiroz, F.L.P. Pessoa, F.S. Liporace and S.G. Oliveira	
Maintenance scheduling and optimization in diesel hydroprocessing unit- feed/reactor effluent exchangers	50
S. Orman, G. Şahin, Ş. Baş, Y. Özçelik, and F. Balkan	
Application of complex approach for troubleshooting related to waste gas preheater fouling	56
P. Stehlík, Z. Jegla and B. Kilkovský	
Considering in-tube crude oil boiling in assessing performance of preheat trains subject to fouling	62
E.M. Ishiyama and S.J. Pugh	
Fouling of a heated rod in a stirred tank system	71
B. Petkovic and A.P. Watkinson	
Minimizing crude oil fouling by modifying the surface of heat exchangers with a flexible ceramic coating	79
O. Santos, J. Anehamre, C. Wictor, A. Tornqvist and M. Nilsson	

Fouling in power plants

The effects of chemical additives on magnetite deposition in boiling heat transfer	85
C. Gasnier and D.H. Lister	
Influence of impurities on corrosion products behavior in feedwater conditions	94

S. Delaunay, C. Mansour, A. Bescond and J-L. Bretelle

**Fouling of steam generator tubes in nuclear power plants:
laboratory tests to reproduce oxides deposition** 101
C. Goujon, T. Pauporté, C. Mansour, S. Delaunay, and J.-L. Bretelle

Dissolution rate of sodium salt scales in falling film evaporators 108
E. Karlsson, A. Broberg, A. Åkesjö, and M. Gourdon

INDUSTRIAL FOULING PROBLEMS

**Fouling of heat transfer surfaces in a steam assisted gravity drainage
(SAGD) in situ facility for the recovery of oil sands bitumen** 116
T. Pugsley, D. Pernitsky, J. Grundler, and E. E. Johnsen

An analysis of likely scalants in the treatment of produced water from Nova Scotia 124
G.P. Thiel, S.M. Zubair, and J.H. Lienhard V

**Effect of fouling on the thermal performance of condensers and on the
water consumption in cooling tower systems** 134
X. Wu, and L. Cremaschi

The effect of start-up on fat (and wax) fouling tests 142
J.-Y. Huang, Y.M.J. Chew and D.I. Wilson

Investigations of polymer fouling on heated and cooled surfaces 150
J.C. Kuschnerow, S. Dorn, H. Föste, W. Augustin, and S. Scholl

**Field tests on heat exchangers equipped with dual enhanced
tubes in a quench water application** 158
J. Provost, J. El-Hajal, and T. Lang

The influence of phosphate on calcium carbonate formation in hard water 165
S. Noda, T. Saito, K. Miya, S. Furukawa, S.M. Clarke, and D.I. Wilson

When is fouling too fast to measure thermally? 170
V.Y. Lister, J.F. Davidson and D.I. Wilson

BIOFOULING

When to clean, how to clean: Biofilms 178
T.A. Pogiatzis, V.S. Vassiliadis, F.J. Mergulhão and D.I. Wilson

**Application of fluid dynamic gauging in the characterisation and
removal of biofouling deposits** 187
O.P.W. Peck, M.R. Bird, A. Bolhuis, and Y.M.J. Chew

Antibacterial efficiency of titanium doped DLC coatings 195
X.J. Su, S. Zhang, Q. Zhao and S. Wang

**Biofilm formation under turbulent conditions: External mass transfer
versus shear stress** 200
J.M.R. Moreira, J.S. Teodósio, M. Simões, L.F. Melo, and F.J. Mergulhão

**Control of bio-fouling in ground and salt water plate heat exchangers
using iodinated bubble infusion: Two case studies** 205
M. Radicone

Methacrylate copolymers for anti-biofouling coatings: A chemical approach	210
D. Pospiech, S. Starke, T. Bünker, F. Müller, R. Frenzel, F. Simon, K. Grundke, U. Oertel, M. Opitz, R. Kruspe and B. Voit	

A new approach for mitigating biofouling by promoting online cleaning using a sacrificial paraffin coating	216
Q. Yang, D.I. Wilson, S. Chang, and L. Shi	

PARTICULATE FOULING

Modeling turbulence and thermophoresis in plate heat exchanger with high solid content	225
U. Ojaniemi, M. Manninen, T. Pättikangas, and M. Riihimäki	

Particulate fouling of polymeric hollow fiber heat exchanger	233
I. Astrouski, M. Raudenský, and M. Dohnal	

FOULING IN AUTOMOTIVE INDUSTRY

Effects of soot deposition on EGR coolers: dependency on heat exchanger technology and engine conditions	240
Y. Bravo, C. Larrosa, C. Arnal, M. Alfè, and R. Bilbao	

CFD transient simulation of the fouling of an EGR cooler in a diesel exhaust environment	247
M.C. Paz, E. Suárez E., M. Concheiro, and J. Porteiro	

CFD study of turbulence induced structures in EGR coolers	255
K. Mohammadi and M.R. Malayeri	

Prediction of fouling in EGR coolers with radial basis function neural networks	265
A. Mirsadraee and M.R. Malayeri	

FOULING DURING FOOD PROCESSING

Critical flow angle for mitigating deposition of skim milk powder on tubes in cross-flow	272
T.G. Walmsley, M.R.W. Walmsley, M.J. Atkins, J.R. Neale and D.M. Addenbrooke	

Fouling of evaporators in maize processing: Developing a fundamental understanding	279
K.D. Rausch, R.K. Challa, Y.A. Zhang, D.B. Johnston, B.S. Dien, V. Singh, and M.E. Tumbleson	

Influence of soluble proteins on the adherence of particulate soils	285
Y. Touré, P.G. Rouxhet and M. Sindic	

EFFECT OF SURFACE PROPERTIES

Kinetics and quantity of crystallisation fouling on polymer surfaces: impact of surface characteristics and process conditions	291
C. Dreiser, L.J. Krätz and H.-J. Bart	

Polymer film heat exchanger for seawater desalination: prevention	
--	--

and cleaning of fouling deposits	296
C. Dreiser, L.J. Krätz and H.-J. Bart	
Nanostructured coatings for resistance to aquatic biofouling	302
P. Navabpour, X. Zhang, and K. Cooke	
Organo silicon and titanium oxide coatings for mitigation of CaCO₃ depositions	308
E. Puhakka and E. Lecoq	
Use of perfluoropolyether coatings to mitigate fouling on heat exchanger metal surfaces	316
V. Oldani, C.L. Bianchi, S. Biella, C. Pirola, and G. Cattaneo	

CLEANING OF HEAT EXCHANGERS

EMbaffle® heat exchanger in fouling operation	324
E.J.J. van der Zijden, V.M. Brignone, M. Rottoli and C.F.J.M. van Lint	
Application of stabilized hydrogen peroxide for the removal of iron polysulfide deposits	329
T. McCartney and R. Shank	
A criterion for the selection of projectiles for cleaning tubular heat exchangers	332
M.R. Jalalirad and M.R. Malayeri	
Optimum injection period of spherical projectiles in tubular heat exchangers	339
M.S. Abd-Elhady, M.R. Jalalirad, and M.R. Malayeri	
The effective removal of FeCO₃ deposits from critical process heat exchangers used in ammonia production using a proprietary ultrasonic chemical cleaning method	346
R. Phillion and T.R. McCartney	
From practice-to-theory-to-practice: Advances in the cleaning of heat exchangers using ultrasound	349
B. Kieser, A. Goode and R. Phillion	

FOULING OF COMPACT AND MICRO HEAT EXCHANGERS

Fouling in a micro heat exchanger during continuous crystallization of solid lipid nanoparticles	354
M. Schoenitz, J.H. Finke, S. Melzig, A. Hohlen, N. Warmeling, C. Müller-Goymann, W. Augustin, and S. Scholl	
Mitigation of crystallization fouling in microstructured heat exchangers with ultrasound	362
J. Bucko and W. Benzinger	
An experimental comparison of brazed type plate heat exchangers based on lifetime requirements of Combi boiler industry	369
G. Çetin, M. Pekgüzelsu and H.M. Altay	

FOULING MITIGATION

Increased shear, reduced wall temperatures, use of hiTRAN Wire Matrix Inserts in systems subject to fouling	372
--	-----

P. Drögemüller, W. Osley and D. Philipp

Crystallization fouling with enhanced heat transfer surfaces	379
B. Crittenden, M.Y. Yang, L. Dong, R. Hanson, J. Jones, K. Kundu, J. Harris, O. Klochok, O. Arsenyeva and P. Kapustenko	
Scale formation and mitigation of mixed salts in horizontal tube falling film evaporators for seawater desalination	386
H. Glade, K. Krömer, S. Will, K. Loisel, S. Nied, J. Detering and A. Kempter	
Pulsed flow and surface coatings to mitigate fouling	397
H. Föste, F. Stehmann, W. Augustin, and S. Scholl	
Fouling and its mitigation in PC boiler co-firing forestry and agricultural biomass	403
S. Kalisz, Sz. Ciukaj, M. Tymoszuik and H. Kubiczek	
Influence of the film flow characteristic on the cleaning behaviour	411
E. Fuchs, A. Boyé, H. Stoye, M. Mauermann, and J.-P. Majschak	
Optimization approach for efficient cleaning with impinging jets – influence of nozzle diameter, pressure and nozzle distance	421
H. Köhler, H. Stoye, M. Mauermann, and J. -P. Majschak	

HEAT EXCHANGER FOULING MONITORING

Comparison of fouling detection methods using experimental data	429
O. Gudmundsson, S. Lalot and J.E. Thorsen	
Pressure Mode fluid dynamic gauging under extreme conditions	437
A. Ali, Y.M.J. Chew, P. Gordon, B. Salley, W.R. Paterson and D.I. Wilson	
Ultrasonic adhesion measurement of whey protein fouling	446
N. Collier, D. Callens, P. Campistron, B. Nongaillard, M. Jimenez, G. Alogaili, P. Debreyne, G. Ronse, and G. Delaplace	
Fouling monitoring in thermosiphon reboiler	453
T. Kuwahara, C. Wibowo, A. Kuboyama, M. Nakamura and Y. Yamane	
A novel fouling and cleaning set-up for studying the removal of milk deposits produced during UHT-treatment	457
C. Hagsten, N. Loren, L. Hamberg, J. Wiklund, F. Innings, L Nilsson, M. Paulsson, C. Trägårdh and T. Nylander	
Following the interactions on the inner surface – A step towards fouling monitoring	465
A. Pereira, B. Pereira, J. Martins and M. Freire
